The Next Chapter in the History of Windows

Why is it important to choose the right replacement window?

Home Value

Light

Beauty

Strength

Comfort

Energy Performance

Windows are an investment that provide beauty, light, warmth, and ventilation. Windows that are properly selected, well designed, well constructed, and properly installed, can increase the overall value of your home.

THE NEXT GENERATION OF WINDOWS

CompositWood® blends the elegant appearance of a true wood window, the maintenance freedom of a vinyl window, and the strength of a metal window, with the best performing energy saving technologies and features.

DeRi*o* Construction represents the “Next Generation”
of windows, doors, and Interstate windows and doors.

THE NEXT GENERATION OF WINDOWS

The Interstate Exclusive **CompositWood®** product was designed and engineered by a team of window and door professionals with more than 75 years of experience within the Window & Building Materials industries.

When sold and installed by professional, factory-authorized Window Dealers, **CompositWood®** windows and doors are considered some of the finest Window & Door products available on the market today.

WHY IS COMPOSITWOOD® BETTER?

Superior Energy Efficiency

Exceptional Durability

Enhanced Appearance

Best Overall Value

WHY IS COMPOSITWOOD® BETTER?

Superior Energy Efficiency

- All **CompositWood®** windows far exceed Energy Star criteria.
- Available Glass packages offer some of the lowest U-Factors in the industry.
- Solid Core frames and sashes offer superior thermal performance.
- Air tight - exceptionally low air infiltration ratings
- More energy-efficiency means greater savings on monthly heating/cooling costs.

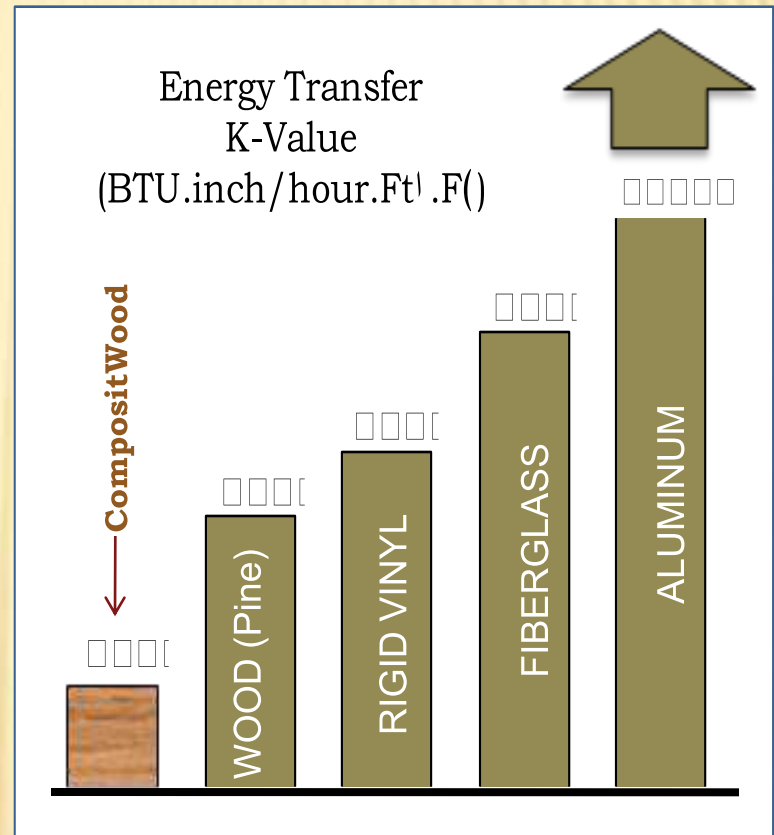

CompositWood® has been recognized by Energy Star as a *MOST EFFICIENT* Window!

SUPERIOR ENERGY EFFICIENCY

CompositWood® has:

- **63% lower** heat transfer value than pine
- **69% lower** heat transfer value than hollow vinyl
- **77% lower** heat transfer value than fiberglass
- **4500% lower** heat transfer value than aluminum

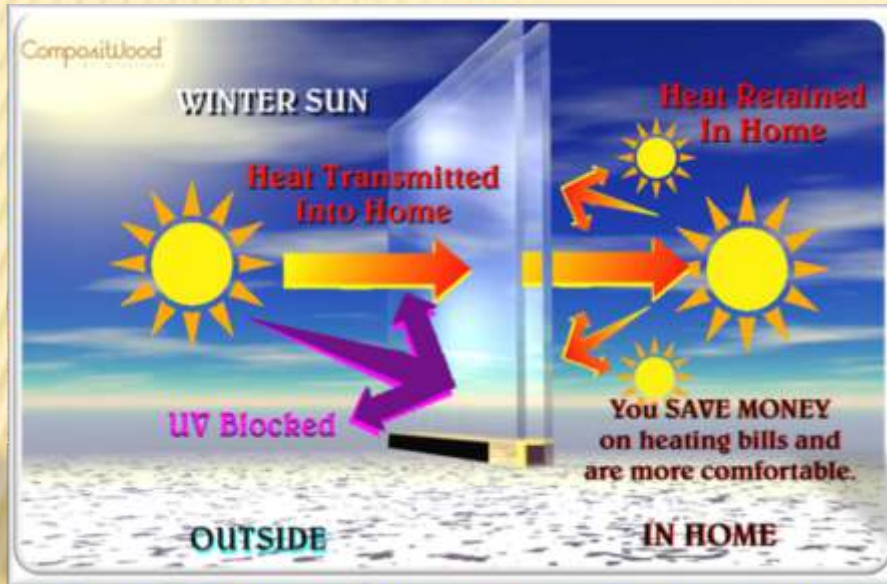

Thermal Conductivity; NFRC data; **lower is better**

Lower heat transfer **SAVES YOU MONEY !!**

SUPERIOR ENERGY EFFICIENCY

Why is Energy Efficiency so important?

By retaining heat in the winter, and retaining cool air in the summer, you can reduce your heating and cooling costs. **YOU SAVE MONEY !!**

WHY IS COMPOSITWOOD® BETTER?

Exceptional Durability

- **CompositWood®** windows, which are made of a solid core material, are not susceptible to any corrosion or rot.

- **CompositWood®** windows are impervious to attack by termites and other insects.

- The **CompositWood®** window has a durable finish that repels water, and will never absorb moisture.
- It is also impervious to salt-air corrosion for coastal climates!

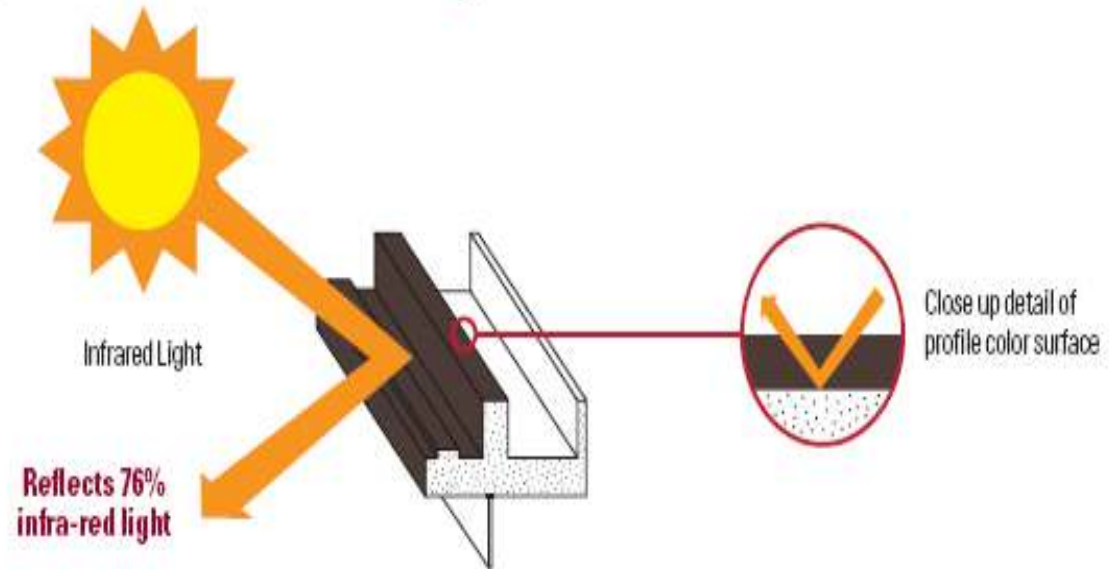

DURABILITY AND STRENGTH

CompositWood® SuperCap technology is a co-extruded, thermally-fused acrylic color layer for superior durability compared to painted surfaces.

Superior Performing Technology

- SuperCapSR low heat absorbing surface **reflects 76% infra-red light***

*Measured by independent lab testing of capstock.

CompositWood® has three times the dent resistance of cellular PVC and wood composites.

WHY IS COMPOSITWOOD® BETTER?

MADE IN THE U.S.A

100% of the components used in
CompositWood® windows
are made using materials and parts that
are manufactured in the USA.

Interstate Window & Door is a dedicated company with outstanding American-made and manufactured products and is proud for keeping jobs in the USA and promoting our economy.

Our Goal is simple:

**To provide a quality American-made product,
sold directly by factory-authorized window specialists,
and installed by factory-authorized installation professionals.**

In 1986, Interstate Window & Door Company donated vinyl windows used in the Restoration Pavilion of the Statue of Liberty National Monument.

WHY IS COMPOSITWOOD® BETTER?

Wood windows show beauty but can be costly, need constant maintenance, and over time are susceptible to decay.

Metal windows have durability but most are severely deficient in energy efficiency and appearance.

Vinyl windows can be energy efficient but not as durable as metal or as strong as a solid core, and they can be plain in appearance.

CompositWood® offers it all !!

- Beauty
- Durability
- Low Maintenance
- Strength
- Energy Efficiency

CompositWood® = □ □ □ □ □

WHY IS COMPOSITWOOD® BETTER?

The choice is simple..

You can pay for the name,

Or

You can invest in an **OUTSTANDING** window!

CompositWood® offers the best return on your home improvement investment.

COMPOSITWOOD® REVIEW

- ❖ Beautiful, durable finishes
- ❖ Virtually maintenance free
- ❖ Energy efficient, solid core insulating property
- ❖ High thermal performance to lower heating and cooling bills
- ❖ Stronger than Vinyl or Wood More efficient than Metal
- ❖ Energy Star Rated MOST EFFICIENT WINDOW CERTIFIED
- ❖ Air tight - exceptionally low air infiltration ratings
- ❖ Impervious to moisture and rot
- ❖ Insect free
- ❖ Lifetime warranty
- ❖ Best return on your investment
